Optimize your workflow

with professional digital transcription

SpeechExec provides you with a transcription management platform that unites workflow automation, transcription features, and speech recognition in one seamless solution. Creating a smooth and future-proof working environment in all documentation-intensive businesses has never been easier.

Enhance your productivity

- All-in-one solution for efficient workflow management
- Individual sort and filter options for easy file organization
- Keyboard shortcuts for easy content control

Designed for professionals

- Seamless integration into Philips digital dictation solutions
- Carousel view for at-a-glance information
- Priority setting and notifications for urgent recordings

Ready for the future

- Geared for Dragon NaturallySpeaking speech recognition software
- Security features and backup for protecting sensitive data
- Automatic updates and licensing via Web for keeping your software up to date

PHILIPS

Highlights

Efficient workflow management

The SpeechExec Pro software organizes the workflow of dictation files and resulting documents between author and transcriptionist, and allows you to monitor the status of your work.

Individual sort and filter options

SpeechExec Pro Transcribe enables users to search for specific dictation files or filter their dictation list by user-definable criteria. Furthermore, the easy-to-use list-sorting options for single and multiple dictations guarantee a quick overview of dictation files.

Keyboard shortcuts

Philips SpeechExec Pro Transcribe incorporates useful keyboard shortcuts. These keystroke combinations make the control of the workflow software easy, quick, and convenient.

Seamless integration

Philips SpeechExec 7.0 Pro Transcribe can be seamlessly and easily integrated into existing Philips digital dictation solutions such as the professional transcription set.

Carousel view

For typists who want to concentrate on getting jobs done one after another, the new SpeechExec Pro Transcribe carousel view option provides a quick and fast overview of the most relevant information. The carousel window displays all dictation files as dictation cards. Every dictation card represents one dictation showing at a glance information on the user, status, priority, and other dictation properties.

Priority setting

With the included priority-setting option, urgent recordings can be prioritized. This guarantees that important dictation files will be identified at a glance and get processed and delivered first.

Geared for speech recognition

The seamless integration of Philips dictation recording devices and the direct interface to Dragon NaturallySpeaking Professional speech recognition software guarantee superb audio quality, high recognition accuracy, and easy hardware administration.

Data security and backup

File encryption and secure file transfer via SSL allow only authorized individuals to access your documents. The optional automatic backup function protects your data against accidental loss.

Web updates and licensing

The automatic software update option and the state-of-the-art web-based licensing keep the SpeechExec Pro workflow software up-to-date at all times – without the hassle of having to check for a new version, download it, and install it manually.
